Other (list):

Agent (buying):

Agent (listing):

Client name(s):

Mailing address:

Phone:

Email:

Repeat (circle): y/n

Additional comments:

It is recommended that the property be vacant. The property also needs to be fully operational and components accessible prior to the inspection. The inspector will not turn on utilities, shovel snow, remove personal belongings, etc. for access, this is the responsibility of the property owner or their agent.

Re-inspections are performed for a fee and are for inaccessible and inoperable components at the original inspection only.
